

Confused about Battery Chargers?

DURST can solve your Problems with their Smart Chargers.

One charger to suit all types of batteries: Gel-AGM (Maintenance Free) & Flooded (Wet) Lead Calcium-Lead Acid-VRLA.

Many chargers available on the market today, claim to suit all battery types!! They achieve this by averaging boost & float charge voltages. This is a compromise & will not charge the complex variety of batteries to full capacity & can reduce battery life.

In the past the best solution was to factory calibrate the charger to a specific battery type which is OK as long as it is not used for another type of battery.

Durst Now Offer a Smart Charging Solution for all *Automotive, Marine, Mobile Home, Electric Scooters, Golf Carts, Solar, Deep Cycle, UPS Standby, Industrial & Commercial Applications.*

Durst Smart Chargers are an advanced three stage switch mode design for Bulk, Absorption & Float cycles with simple Selection Switches for Gel/Flooded Batteries & Float Equalization switch to give Maximum Charge to all Batteries which will extend their life by correctly charging to Manufacturers Specifications.

Available in a comprehensive range of single & multi outputs in 12 & 24 Volts, from 5 to 50 Amps & are Recommended for Batteries 18-800AH.

Durst Smart Charger Features:

- Fully Automatic Fast & Safe
- High Efficiency & cheaper to run
- Input Voltage 170-270 Volts AC 50 Hz
- Overcharging Protection
- Short Circuit Protection
- Spike & Surge Suppression
- Isolated Output Terminals
- Battery Type Selector Gel/Flooded
- Equalize Float Voltage Choice
- Three Stage Charging Indicator LEDS
- Switch mode Design
- Eliminates Sulphation
- Heavy Duty
- User Friendly
- Compact & Light Weight
- Australian Electrical Standard & EMC Compliant
